NMSU Grants has been serving the rural communities since 1968.

Aug. 10th, 2011

Quick Glance : Dual Credit

- Take advantage of courses not otherwise available and earn credit at both the college and high school level.
- Experience the collegiate lifestyle early and learn what to expect from college.
- Find out what you like! Get the chance to explore possible careers and college majors before you've graduated.
- Reduce the costs of higher education. Dual Credit classes are offered with free tuition, books provided by the school district, and general fees are waived.

Small class sizes optimize teacher-student relationships and offer a strong sense of community and connection.

The Dual Credit Program

The Dual Credit Program was established to increase educational options and opportunities for high school students. Eligible high school students are allowed to enroll in college level courses, simultaneously earning credit at both secondary and post-secondary levels.

Dual Credit exposes students to college level responsibilities, allows students to investigate career options that schools and districts otherwise could not provide, and offers students a low cost/no cost pathway to earning college credits before they graduate from high school.

Benefit from the facts!

Research on Dual Credit programs shows increased success rates for dual credit students extending through high school, into college and beyond. Enrollment increases the rate at which students graduate from high school and shortens time needed to complete a college degree.

Eligibility

- Be enrolled in public high school in one-half or more of the required courses.
- Parent and high school permission.
- Meet general requirements for admission and academic standing required by the university.

Classes to choose from

- Course choices must lead to a degree or vocational certificate (automotive, early childhood education, nursing, social work, etc.)
- Courses are available as traditional lectures, web based, and hybrid—lectures with some material available online.

“Education is not received.
It is achieved.”
